NADP Equipment Modernization - Electronic Raingage Requirements

For the most current information about NADP equipment requirements, please see the NADP web page: http://nadp.sws.uiuc.edu

By the end of 2009, all sites must be equipped with one of these precipitation gages:

- ETI Instrument Systems, Inc.’s NOAH IV Total Precipitation Gage, or
- Hach Environmental, Inc.’s OTT NADP Pluvio Precipitation Gage.

The gages are pictured below with contact information for their distributors. These gages produce an electronic signal, eliminating ink pens, charts, and clocks. They meet the performance criteria specified by the NADP committees.

ETI Instrument Systems, Inc.
Model: NOAH IV
